

Transform Your Development Team with AI Workers

Your New AI Development Team Members Are Ready to Start Today

The Challenge

Development teams face constant pressure to deliver high-quality code quickly while maintaining standards and documentation. Common bottlenecks include:

- Delayed code reviews blocking deployments
- Inconsistent requirement gathering and documentation
- Time-consuming task breakdown and management
- Limited resources for maintaining quality standards

Meet Your New AI Team Members

Integrate our AI Workers directly into your GitHub workflow – they're not just tools, they're team members with their own accounts and capabilities:

Aismith - Product Manager/Tech Lead

Coordinates the team and ensures alignment between business needs and technical execution

Technical System Analyst

- Engages with stakeholders through GitHub
- Converts ideas into detailed user stories
- Provides accurate story point estimates
- Defines clear acceptance criteria

Team Lead

- Breaks down user stories into actionable tasks
- Assigns work to appropriate team members
- Manages dependencies and workflow
- Ensures efficient resource allocation

Code Reviewer

- Reviews PRs 24/7 with consistent quality
- Enforces coding standards
- Verifies test coverage
- Provides detailed, actionable feedback

How It Works

1. Open a GitHub issue with your feature request
2. AI Workers automatically:
 - Gather requirements and create user stories
 - Break down work into manageable tasks
 - Assign and track dependencies
 - Review code changes
 - Maintain documentation

Real Business Impact

Accelerate Development

- Instant PR reviews eliminate bottlenecks
- 24/7 availability speeds up development cycles
- Automated task management reduces overhead

Improve Quality

- Consistent code reviews
- Standardized documentation
- Clear requirement tracking

Empower Your Team

- Reduce manual overhead
- Focus on complex problems
- Maintain quality at scale

Getting Started

1. Choose your AI Workers

2. Add them to your GitHub repository
3. Configure their roles and permissions
4. Watch as they seamlessly integrate into your workflow

Why Choose Our AI Workers?

- **Real GitHub Integration:** Workers operate with their own GitHub accounts
- **True Team Members:** Not just tools – they understand context and collaborate
- **24/7 Availability:** Never sleep, never miss a task
- **Consistent Quality:** Maintain standards without compromise
- **Scalable Solution:** Add workers as needed
